**"Cell Be Together"**  
18" X 24", mixed media, acrylic on canvas, 2012

My work reflects my deep faith in God and the wonder I have for the complexities of the world around us.

My artistic journey began when I practised traditional Chinese brush painting in Hong Kong. Since moving to Canada I have opened myself to new influences over the years; I now find myself exploring DNA arts.

I am fascinated by the vibrant structures that are beyond our eyes' reach. The lens of the microscope reveals a unity, both physical and spiritual, and it is this that I try to express in my art.
